INDIAN INSTITUTE OF TECHNOLOGY, PATNA

Placement Brochure 2022-23
M.Sc. Mathematics

ABOUT US :

- Department of Mathematics at IIT Patna is one of the well established and leading departments contributing towards research as well as industries.

- The course is designed in such a way that helps students to excel in their academic as well as technical skills.

- Being a Basic Science course, students are more interested to get into depth of the matter and provide appropriate solutions.

- Students are well aware of statistical and mathematical approaches which helps in solving many industrial as well as day-to-day life problems.

COURSES OFFERED

CORE SUBJECTS:

- Linear Algebra
- Data Structure and Programming
- Probability and Statistics
- Operational Research
- Ordinary and Partial Differential Equations
- Combinatorics
- Real and Complex Analysis
- Numerical Analysis

ELECTIVES:

- Graph Theory
- Number Theory
- Mathematical Modelling
- Statistical Inference
- Statistical Decision Theory
- Control Theory
- Cyber Security with block chain
- Machine Learning
- Artificial Intelligence

WORKSHOPS:

Various Workshops on Python and Data Analysis have been conducted.

WHY HIRE US ?

US

COMPANIES

Benefits

Smart Thinkers

Great Problem Solving Approach

Fast to adapt

Experience

College Projects, Workshops

Been involved in leading various posts for the institute

Good Connection and Communicational Skills

Features

Great coordination as a group.

Mathematical Approach with soft skills.

Great explorer.

Wants

Fast To Adopt Things

Understand and coordinate well with People

Smart approaches

Fears

Losing Positions

Locked Into A Fixed Environment

Needs

Problem Solver

Healthy Environment

Save Money and Information.
